Submission Date	Jun 6, 2026
1. How often do you update your work account passwords?	Only when required by the system
2. I use a unique and strong password for each of my work accounts and systems.	
Select your response	Agree
3. Which of the following email signs would make you suspicious? (Select all that apply)	None of the above
4. I feel confident identifying a phishing email or a suspicious link before clicking on it.	
Select your response	Strongly Disagree
5. In your opinion, what is the biggest gap in how the organisation currently handles phishing threats or suspicious communications?	There are multiple authentication mechanisms, which makes managing passwords and access keys tedious, so there is a tendency to use a single password/key.
6. What do you typically do when leaving your workstation unattended?	Leave it open if I plan to return soon
7. I apply software and security updates on my work device promptly, without delaying or dismissing them.	
Select your response	Neutral
8. What would you do first if you suspected a cybersecurity incident on your workstation or account?	Try to investigate or resolve it myself
9. I know exactly how and where to report a cybersecurity incident within this organisation.	
Select your response	Strongly Disagree
10. Have you read and understood the organisation's cybersecurity policy?	I have only read parts of it
11. The cybersecurity training I have received so far is sufficient to handle threats relevant to my role.	
Select your response	Strongly Disagree

12. What one improvement would you suggest to strengthen cybersecurity awareness or practices in your workplace?
Please be as specific as possible.

It would be useful to simplify the security mechanisms and tools
