

Overview

BSBXCS402 Promote workplace cyber security awareness and best practices

ICT60220 - Advanced Diploma of Information Technology

Learner Guide

Application of the unit

This unit describes the skills and knowledge required to apply critical thinking in order to develop solutions to complex issues arising in the workplace.

The unit applies to individuals who are required to think critically in order to develop structured and innovative solutions to overcome complex organisational issues. Individuals in these roles operate with a high degree of autonomy and may undertake non-standard work tasks involving escalated risks. These individuals are often responsible for a team or work area.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Learning goals

Learning goals include:

- You are able to think critically in order to identify complex issues in the workplace.
- You are able to use a critical thinking approach to source information about complex issues and generate alternative solutions.
- You are able to apply sound decision-making principles when selecting the best solution to complex issues.
