

Reviewing cyber security practices

Item 5 of 9

Reviewing cyber security practices

To support the effective implementation of cyber security practices, it will be necessary to review these to ensure that employees are following the policies and procedures communicated.

Consider the following cyber security practices and why you need to review these:

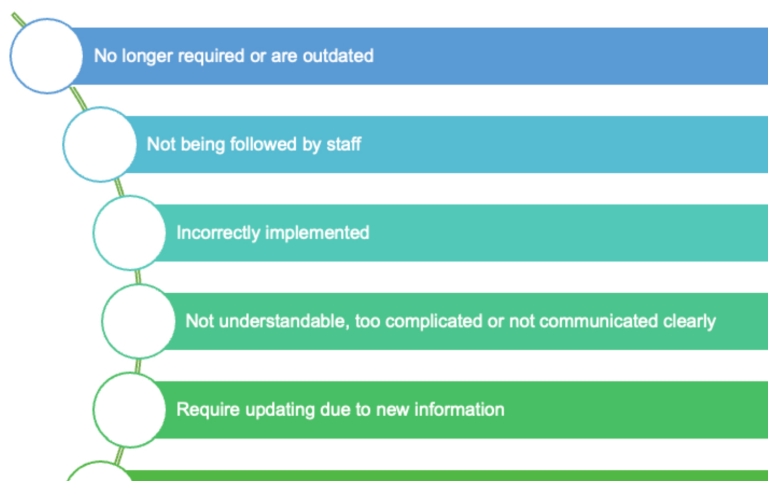

Virus protection	Software may not be updated.
Authorisation to protected files	Staff may leave or change roles
Acceptable use policy	New social media apps being introduced or restricted
Bring your own device	New staff not following guidelines
Legislative and regulation requirements	These can constantly change so need to be reviewed and current practices updated accordingly.

Review and updating cyber security practices should be a continual and cyclic process as threats can change as the business, industry, resources, staff and environment changes. Using reporting mechanisms for tracking changes and making updates can provide a formal process to ensure that any modifications are recorded and followed up.

Upon review you may find that the practices are:

Activity: Watch

Read the article and watch the video on the top security predictions for 2021:

<https://www.govtech.com/blogs/lohrmann-on-cybersecurity/the-top-21-security-predictions-for-2021.html>

Write down your key takeaways.

The trainer/assessor will facilitate a discussion about the outcomes from the video.

Activity: Research and discuss

1. Review the following cyber security practices that are not being followed and identify what issues could arise from each.

A virus has been detected, contracted from downloading software not approved by the department.

No updates have been performed on the operating system software.

Staff are not undertaking the mandatory professional development training on cyber security best practices.

2. Review the following Cyber Policy:

<https://www.jcu.edu.au/policy/information-and-communications-technology/cybersecurity-policy>

What principles could you apply to the above practices not being implemented?

The trainer/assessor will facilitate a discussion.
