

Item 1 of 13

Complete the table below by identifying the title of the legislation for each legislation area and then describing the relevance of the legislation to cyber security and impact on businesses.

Legislation	Legislation title	Relevance to cyber security and impact on business
a. Data protection and privacy	Data protection through the Privacy Act 1988	In Australia, organisations are legally mandated to take reasonable protection to protect the personal information they hold from misuse, interference, loss, unauthorised access, modification, or disclosure. Businesses can face fines : 1. up to \$50 million 2. 3 times the value of the benefit 3. 30% of the company's adjusted turnover during the breach period.
b. Notifiable data breaches	Privacy Amendment (Notifiable Data Breaches) Act 2017	Companies are required, through their security teams, to assess and report whether a data breach is likely to cause serious harm to individuals. Furthermore, it is mandatory to immediately disclose any data breaches that have occurred (involving certain data). They must also notify the affected individuals and the OAIC.
c. International legislation	National Cybersecurity Protection Act of 2014 (USA)	Promotes automated, multi-directional sharing of technical threat indicators and defensive measures between public and private sectors via standardised machine-to-machine protocols (such as STIX/TAXII feeds feed into enterprise firewalls/SIEMs). Offers specific liability protections for businesses that voluntarily share cyber threat indicators with the centre, removing antitrust and privacy exposure to foster an environment of open, rapid defence collaboration.
